GREEN SKILLS TOOLKIT – OFFICIALLY FINALIZED

The ECO – BOOST Green Skills Toolkit is officially finalized and ready for piloting! Consisting of three different modules – two general modules for green skills, providing comprehensive and flexible learning experience and a tailor-made module, presenting sector-specific training in the four project core domains – Construction, Healthcare, Electricity, Furniture&Textile.

To validate and further improve the Toolkit, the ECO- BOOST consortium envisages to pilot it in a series of events during the upcoming months.

BE PART OF THE ADVISORY BOARD – YOUR OPINION MATTERS

If you are:

- A VET provider,
- Representative of SME or one of the project targeted sectors – Construction, Healthcare, Furniture&Textile, Electricity,
- Representative of a Public authority or NGO

and you want to get to know the Toolkit in detail and be one of the first experts, who have the opportunity to share their feedback, join the National Advisory Boards in one of the partners countries. *Follow us on Facebook for updates!*

PILOT BOOTCAMPS – EXPERIENCE THE TOOLKIT BY YOURSELF

Test the modules of the Toolkit and be part of the process of improvement of its initial version to a comprehensive one – check out the methodology and good practices, introduced in each of the Toolkit's modules and validate the skills, presented as existential for the future labor market in the four project target domains.

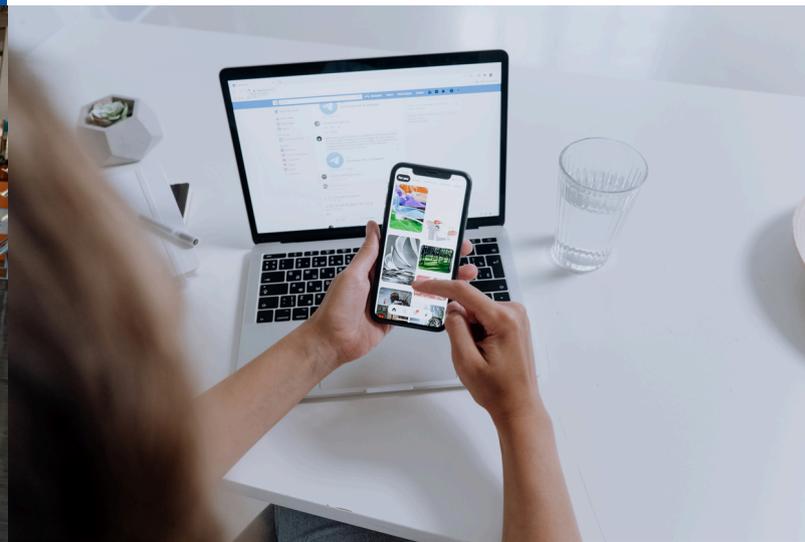

If you are a VET educator/trainer, educational methodologists or career advisors, attend one of the Bootcamps and be part of the ECO- BOOST Revolution! *Link available on Page 2 of the Newsletter.*

MEET THE PARTNER

CETEM

CETEM is a business association and training center located in the south-east of Spain, which aims at transferring any kind of innovation to industries, mainly SMEs, actively contributing towards their socio-economic development.

Currently, CETEM represents around 100 companies, mainly SMEs of the furniture and wood sector, and is formed by more than 40 professionals working in different fields of expertise: Product Engineering (Specialized in 3D design, CAD modelling, 3D printing and product virtualization), Materials Science, Electronics & Domotics, Processes technology and Industrial and Organizational Psychology. The organization is actively working in research and innovation activities and the delivery of learned-centered VET programmes focused on the furniture sector.

CETEM manages more than 30 VET programs per year, covering a wide range of areas from design, 3D printing, technology transfer, IPR rights, and production management to quality standards.

The association is an official training provider of the Employment and Training public service office of the Region of Murcia and a member of the European Federation on Forest and Wood Knowledge (INNOVAWOOD) and the National Association of Technology Centers (FEDIT).
